Flow 50 to 200 m²/mn

The Power Head Foam is particularly impressive, shooting a vast amount of foam. Effective, and easy to set up, you'll love using this machine to create decorations or giant show-stoppers.

The Power Head Jet-Foam is powerful, reliable and gives high quality foam. The foam is produced in the head, and is shot out in a steady stream.

Rose petals

The Power Head Projection uses the Venturi effect to shoot, continuously, a huge volume of products such as confetti, paper snow, flower petals, pop-corn, foam balls etc.

The Power Head Striptease is specially designed to give a snowfall effect for paper, confetti, raining glitter or rose petals. This machine focuses the effect on a very concentrated area, and is ideal for stage effects and catwalks.

Rain Projection 6 to 10 m

The Power Head Mist and Rain lets you create your own weather. To give a cool feel to your show, shoot water in fog mode. When you need to create something a little stormy, add wind and rain in rain mode.

The Power Head Wind lets you concentrate a narrow gust of wind. Use it without the head for a wide, powerful wind effect. The head lets you double the air flow while narrowing the scope of the effect.

The Power Head Fragrance uses a very precise, high-performance technology to diffuse aromas. Thanks to its power, you can use the Fragrance head to change aromas in only a few seconds, and to diffuse them into any space you want. Using 100% natural essential oil, you can add a fourth dimension to your shows and target not just sight and sound, but smell too.

See our catalog for a choice of several hundred different aromas, or ask us and we'll make one just for you.
